Subsystems Supported By Natural ISPF

This section lists all available subsystems supported by Natural ISPF.

- The subsystem abbreviation preceded by the plus sign + is used when activating the subsystem for your site in the CONFIG member.
- The subsystem abbreviation shown in the right-hand column of the table is used in menu lines in menu definition, and in the Site Control Table when defining new objects or commands using the Open NSPF facility.

Subsystem in CONFIG	Abbreviation in CONFIG member	Abbreviation
Natural	+N	N
OS/390	+M	M
VSE/ESA	+D	D
BS2000/OSD	+B	B
CA-LIBRARIAN	+L	L
PANVALET	+P	P
Con-nect *	+C	C
SAT * (System Automation Tools)	+S	S
Incore Database	+O	O

* See note on following page

Note:
Con-nect (Software AG's office management system) is a separate product of Software AG. SAT (System Automation Tools) is a technical product delivered together with all of the following products: Entire Operations, Entire Output Management and Entire Event Management. It is recommended that the subsystems **C** and **S** be activated only if the related products are installed in your system environment. The functions made available by activating subsystem **C** are described in the subsection Con-nect Documents in Section Common Objects of the Natural ISPF User's Documentation. For a description of the functions related to subsystem **S**, see the subsection Defining SAT, Natural and Product Parameters in the System Automation Tools Documentation:

- Entire Operations Installation and Operations documentation
- Entire Output Management Installation and Customization documentation and
- Entire Event Management Installation and Customization on Mainframes documentation.
